

Trabalho sobre biblioteca javascript.

Trabalho em duplas

Escolher "três" bibliotecas javascript.

Integrar com php (uma até duas tabelas - caso de uso 1-n recomendável)

Apresentar trabalho (explicar a biblioteca, mostrar exemplo de implementação funcionando e explicar o código).

Bootstrap (<http://getbootstrap.com/>)
AngularJS (<https://angularjs.org/>)
Google Chart (<https://developers.google.com/chart/>)
Google Maps (<https://developers.google.com/maps/>)
Two.js (<http://jonobr1.github.io/two.js/>)
Transit - (<http://ricostacruz.com/jquery.transit/>)
Select2 - (<http://ivaynberg.github.io/select2/>)
Turn.js (<http://www.turnjs.com/>)
MetroUI - (<http://metroui.org.ua/>)
Draggabilly - (<http://draggabilly.desandro.com/>)
BootBox - (<http://bootboxjs.com/>)
Gridster - (<http://gridster.net/>)
Sparklines - (<http://omnipotent.net/jquery.sparkline/#s-about>)
DataTables - (<http://www.datatables.net/>)
SliderShock - (<http://www.jqueryslidershock.com/>)
Noty - (<http://ned.im/noty/>)
Alertify - (<http://fabien-d.github.io/alertify.js/>)
Planetary.js - (<http://planetaryjs.com/>)
MixItUp - (<https://mixitup.kunkalabs.com/>)
Magnific Popup - (<http://dimsemenov.com/plugins/magnific-popup/>)
JQuery Menu - (<https://github.com/kamens/jQuery-menu-aim>)
ToolTipster - (<http://iamceege.github.io/tooltipster>)
HTML5 Sortable - (<http://farhadi.ir/projects/html5sortable/>)
JQuery Knob - (<http://anthonyterrien.com/knob/>)
Cyclotron.js - (<http://kaioa.com/k/test/cyclotron/index.html>)
JSPlumb - (<http://www.jsplumb.org/demo/home/dom.html>)
SmartMenus - (<http://vadikom.github.io/smartmenus/src/demo/>)
Echo.js - (<http://toddmotto.com/echo-js-simple-javascript-image-lazy-loading/>)
Tabulous.js - (<http://git.aaronlumsden.com/tabulous.js/#demo>)
Tree.js (<http://threejs.org/>)
Bounce - (<http://bouncejs.com/>)
MotorCortex - (<http://motorcortexjs.com/>)
Dynatable - (<http://www.dynatable.com/>)
JCanvas - (<http://calebevans.me/projects/jcanvas/>)
Promin - (<http://timseverien.com/projects/promin/>)
